### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The Applicant claims a fuel cell system comprising a reaction vessel having a catalyst for promoting an endothermic reaction, and further comprising at least a first and second heat exchanger device spaced apart from each other, wherein the heat exchangers are independently controlled so that heat transferred by the heat exchangers to the catalyst and the temperature of the catalyst may be varied at different locations within the reaction vessel corresponding to the location of the heat exchangers, and wherein the reaction vessel comprises a plurality of parallel substrates, each of the substrates having a first and second surface, the surfaces located on opposite sides of the substrate, and an endothermic reaction catalyst overlying the first surface, and an exothermic reaction catalyst overlying the second surface, wherein the substrates are constructed and arranged to transfer heat from the second surface to the first surface.

The prior art of record, Hsu et al., U.S. Pat. No. 6,183,703 B1, teach a fuel cell system comprising a reaction vessel having a catalyst carried in the vessel for endothermic reaction and comprising at least a first and second heat exchanger, wherein the devices are independently controlled so that heat transferred by the heat exchangers to the catalyst, and the temperature of the catalyst, may be varied at different locations within the reaction vessel corresponding to the location of the heat exchanger devices and wherein the reaction vessel comprises a plurality of parallel

substrates. Hsu et al., teach a combustion band catalyst, a reforming band catalyst and an electrode material all on the same surface of a flat ceramic electrolyte substrate.

However, the prior art of record, taken alone or in combination, fails to disclose or render obvious the reaction vessel comprising a plurality of substrates, each substrate having a first and second surface, and wherein the first and second surface are located on opposite sides of the substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
